OUR TURNKEY SOLUTION TOGETHER WITH EXPERTISE IN THE DESIGN, ENGINEERING, INSTALLATION AND OPERATION OF HIGH PERFORMANCE AUTOMATED BLENDING SYSTEMS OPTIMIZES PROFITABILITY AT DEPOTS/TERMINALS AND PIPELINES.

**INTERNATIONAL BUTANE BLENDING**

## PATENTED BLENDING SYSTEM

- Texon has been a pioneer of blending finished gasoline for over 20 years.
- The system tests the base fuels to determine the maximum amount of butane that can be safely blended into the finished gasoline for a specific country, region, or city.
- Via a programmable logic controller, the system monitors real-time volumes and communicates with the blending skid valves, analyzers, and meters injecting the appropriate amount of butane into gasoline.
- Our Proprietary Blending Systems are designed to test gasoline and optimally blend butane to meet finished product quality requirements.
- Texon's Internationally Patented System is designed for use in Pipelines, Depots/Terminals, Marine Docks, and Truck Loading Racks. Our system has been installed at over 40 locations in the United States.
- Texon's design specifications meet all safety and regulatory requirements.

## BUTANE SUPPLY

- Over 20 years, Texon has developed relationships with key butane and logistics suppliers to meet Customer needs.
- Our comprehensive process considers a robust product certification program and a supply infrastructure including storage, transportation, transloading and scheduling expertise.
- Texon can monitor customer inventory and is well positioned to deliver keep-fill butane supply to the customer.

## SERVICE

- Texon was built on service and it is our mission to be the best service provider in our industry.
- We provide field and technical support and are dedicated to provide optimal performance of our system.
- We have built vigorous preventative maintenance into our program and focus on continuous improvement.
- Our team consists of compliance and regulatory staff and experienced schedulers to ensure prompt delivery of certified butane.
- We work with our Customers to develop specific reports to support performance and profitability.
